Our ref.: 27002/2023/I/GCOS/GCOS-NFP

21 December 2023

Subject: Nomination of national focal points for matters related to the Global Climate Observing System (GCOS) and related Climatological matters (Regional Basic Synoptic Network)

Action required: To provide the WMO Secretariat with name and contact of the national focal point

Dear Sir/Madam,

In line with *The 2022 GCOS Implementation Plan* (GCOS-244), there will be an increased engagement with participating countries.

This process has started with a review of the national focal points on matters related to GCOS and to other climatological matters such as the Regional Basic Synoptic Network, hereinafter called GCOS national focal points.

This review established that there are no GCOS national focal points assigned for your country.

Therefore, I would be grateful if you could nominate a GCOS national focal point following the formal procedure by updating your Country Profile Database (CPDB) through the [Community Platform](#).

Please do not hesitate to contact the GCOS Secretariat directly (abombelli@wmo.int), should you encounter any problems with the CPDB.

Please note that the GCOS national focal point's role can also be assigned to your WMO Integrated Global Observing System (WIGOS) national contact point, should their expertise match the terms of references, listed here below:

- Liaise within the National Meteorological and Hydrological Services on GCOS related networks (including the GCOS Surface Network and GCOS Upper-Air Network) issues related to data availability and quality;
- Inform the Commission for Observation, Infrastructure and Information Systems (INFCOM) Lead Centres for GCOS on current and potential problems that might impact data availability and quality;
- Respond to requests from the GCOS Secretariat and Lead Centres regarding metadata, and data availability and quality.

Yours faithfully,

Dr Wenjian Zhang
for the Secretary-General

To: Permanent Representatives of Members with WMO (limited distribution)
