Nuestra ref.: 00960/2018/WDS/SDD/RAA

1 de febrero de 2018

Anexos: 2 (disponibles en inglés solamente)

Asunto: Registro de las autoridades de alerta de los Miembros de la Organización Meteorológica Mundial

Finalidad: Actualizar las entradas correspondientes a su país que figuran en el Registro internacional de autoridades de alerta, preferiblemente **no más tarde del 16 de febrero de 2018**

Estimado señor/Estimada señora:

Como sin duda sabrá, en 2010 la Organización Meteorológica Mundial (OMM) presentó el Registro de autoridades de alerta de los Miembros de la Organización. El objetivo del Registro es permitir que las autoridades de alerta, los administradores de situaciones de emergencia, los medios de comunicación y otros intermediarios utilicen el Registro como referencia de forma regular en la ejecución de sus operaciones.

A fin de mantener la lista de editores actualizada, le solicito que la examine (véase el anexo I) y verifique si es necesario designar un editor (si no lo ha hecho aún) o cambiar el editor. Para hacerlo, envíe una carta oficial o un correo electrónico a la OMM (con copia a [SMuchemi@wmo.int](mailto:SMuchemi@wmo.int)). Para solicitar la inscripción como editor, sírvase utilizar el siguiente enlace:

<https://alerting.worldweather.org/edit.php?editor=new>

Los editores del registro autorizados pueden editar la página a través del siguiente enlace:

<https://alerting.worldweather.org/edit.php>.

Cada Miembro de la OMM debe tener, al menos, una entrada en el Registro, pero también puede tener entradas múltiples. Una entrada en el Registro contiene la siguiente información: nombre del Miembro (lista de Miembros disponible en <https://www.wmo.int/cpdb/>); nombre de la organización a la que pertenece la autoridad de alerta; tipos de mensajes con respecto a los cuales la organización tiene autoridad; direcciones de internet donde la autoridad de alerta publica sus previsiones y/o mensajes de alerta; y el área geográfica para la que la organización realiza las alertas (véase el anexo II —ejemplo de capturas de pantalla—).

El acceso público al Registro es a través del siguiente enlace: <http://alerting.worldweather.org/>

A los Representantes Permanentes (o Directores de los Servicios Meteorológicos o Hidrometeorológicos) de los Miembros de la OMM – Miembros no registrados (Registro de autoridades de alerta) (distribución limitada)

Los Miembros que necesiten supervisar las actualizaciones también pueden suscribirse al canal de noticias del Registro (formato RSS: <http://alerting.worldweather.org/rss.xml> o formato ATOM: <http://alerting.worldweather.org/atom.xml>).

El Registro busca asegurar una prestación de servicios eficaz en cuanto a la provisión de información y avisos oficiales a las autoridades pertinentes y a los organismos de respuesta en caso de emergencia con el fin de ayudarlos en su misión de proteger las vidas, los medios de subsistencia y los bienes de la población que atienden.

Le saluda atentamente.

(W. Zhang)

por el Secretario General

WMO Register of Alerting Authorities [ home ]

OID: 2.49.0.0.840.0 WMO Member: United States of America ISO 3166: US USA 840

Issuing Organization: National Oceanic and Atmospheric Administration (NOAA), National Weather Service

Hazard Categories: Geo Met Fire Health Env CBRNE

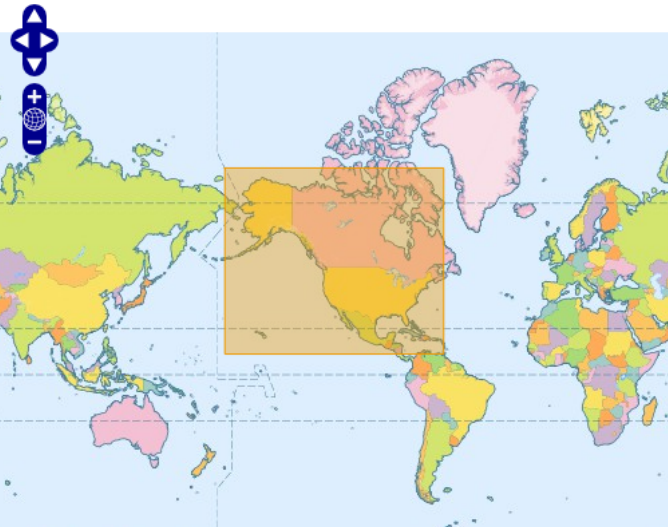

Authorization Basis: The National Weather Service Organic Act of 1890, currently codified as amended in section 313 of title 15 of the federal statutory code (called the United States Code) authorizes the National Weather Service to issue and distribute warnings of environmental hazards. The authority is summarized as: The National Weather Service (NWS) provides weather, hydrologic, and climate forecasts and warnings for the United States, its territories, adjacent waters and ocean areas, for the protection of life and property and the enhancement of the national economy. NWS data and products form a national information database and infrastructure which can be used by other governmental agencies, the private sector, the public, and the global community. In addition, the National Weather Service supports the Emergency Alert System and provides, in coordination with the Federal Emergency Management Agency, public dissemination of critical pre-event and post-event information of all hazards, including natural disasters and terrorist events. The National Weather Service all-hazards support authority emanates primarily from the National Response Framework as authorized by The Homeland Security Act of 2002, codified predominantly as amended in sections 101 to 557 of title 6 of the United States Code, and The Robert T. Stafford Disaster Relief and Emergency Assistance Act, codified as amended sections 5121 to 5206 of title 42 of the United States Code.
