الرسالة رقم:

2 (متوافران بالإنكليزية فقط)

عدد المرفقات:

الموضوع: حلقة تدريب دولية بشأن نظم رصد الهواء العلوي
(اسطنبول، تركيا، 16-20 تشرين الأول/ أكتوبر 2017)

الموضوع:

الإجراء المطلوب: ترشيح أعضاء لحضور الدورة التدريبية المشار إليها أعلاه في موعد غايته
20 أيلول/ سبتمبر 2017

تحية طيبة وبعد،

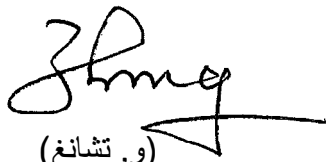

يسعدني أن أبلغكم أن جمهورية تركيا ستستضيف دورة تدريبية دولية بشأن "نظم رصد الهواء العلوي"،
في الفترة 16-20 تشرين الأول/ أكتوبر 2017، في مرافق مركز التدريب الإقليمي التابع للمنظمة (WMO)، في
اسطنبول، تركيا.

والغرض من هذه الدورة هو تقديم عرض عام ومعلومات عامة للمتدربين عن السمات الأساسية لنظم
رصد الهواء العلوي، وتبادل الخبرات والمعلومات بين مرافق الأرصاد الجوية في البلدان المختلفة. ومن المزمع تنظيم
هذه الدورة في إطار مهام المقرر المعني بمواد وأنشطة التدريب (R-TA&TM)، التي حددها فريق الإدارة التابع للجنة
أدوات وطرق الرصد (CIMO).

وهذه الدورة موجهة لفنيي الأرصاد الجوية والراصدات المعنيين برصد الهواء العلوي، وستجري باللغة
الإنكليزية. وسيعفي المرفق التركي للأرصاد الجوية مشاركاً واحداً ممن يُقبل من كل بلد من رسوم التدريب، وسيوفر
لهم إقامة كاملة، بما يشمل المسكن ووجبات الإفطار والغداء والعشاء وتكاليف التنقل الداخلي. ويتحمل المشاركون
أنفسهم أو حكوماتهم تكاليف السفر الدولي، بما في ذلك تكلفة بطاقات السفر ذهاباً وإياباً ومصاريف العبور (الترانزيت).
ومرفق طيه "معلومات عن الدورة" و"استمارة ترشيح المشاركين".

ويرجى من المرشحين المهتمين استيفاء استمارة ترشيح المشاركين المرفقة، التي ينبغي أن يصدق عليها
الممثل الدائم لبلدهم، وإعادتها مباشرة إلى مركز التدريب الإقليمي (RTC) بتركيا (السيدة Ms Afife Hande
Türkyilmaz، ahturkyilmaz@mgm.gov.tr) في موعد لا يتجاوز 20 أيلول/ سبتمبر 2017.

وتفضلوا بقبول فائق الاحترام،

(و. تشانغ)
عن الأمين العام

إلى: الممثلين الدائمين لأعضاء المنظمة (أو مديري مرافق الأرصاد الجوية أو الأرصاد الجوية الهيدرولوجية)

INTERNATIONAL TRAINING COURSE ON

“Upper Air Observing Systems”

16-20 October 2017, Istanbul, TURKEY

GENERAL INFORMATION

Objectives of the Training Course

The aim of the course is to give a general view and information to the trainees about the basic features of upper air observation and exchange the experiences and information between the meteorological services of different countries.

To watch the atmosphere and the weather phenomena occurred is getting more and more important for the developing world. To be able to meet the meteorological requirements of the developing world, it is very obvious that there is a necessity for the provision of accurate and timely weather observations which will be the essential input of weather forecasts and numerical weather prediction models, research studies on climate and climate change, sustainable development, environment protection, renewable energy sources, etc. All outputs and products of any system are input dependent. So, accuracy, reliability and efficiency of the products of any meteorological study will depend on its input: Observation.

Radiosondes have been used for observing the upper air. A radiosonde is a balloon-borne instrument used to simultaneously measure and transmit meteorological data while ascending through the atmosphere. The instrument consists of sensors for the measurement of temperature, and relative humidity. The sensors' information is transmitted in a predetermined sequence to the ground receiving station where that information is processed at some fixed time interval. When wind information is processed by tracking the balloon's movement the instrument package is termed a rawinsonde. Pressure is calculated according to altitude data by means of the GPS' altitude data.

This course has been planned to be organized within the scope of the tasks of Rapporteur on Training Materials and Training Activities (R-TA&TM) established by CIMO Management Group.

Upon completion of the course;

Trainees will be able to;

- a) understand why we need more reliable, more accurate and continuous meteorological data and how these requirements can be met,
- b) learn basic principles and approach of upper air observation and its instruments,
- c) take benefits of experiences from users of an upper air observation,
- d) get the view how to maintain an upper air observation network.
- e) get knowledge about different types of radiosondes,
- f) get knowledge about different types of getting ozone data.

Trainers will be also able to;

- a) understand weak and strong parts of their knowledge and teaching method,
- b) learn how they can transfer their knowledge to the trainees,
- c) take the opportunity to check their system's features once more under questions of the trainees,
- d) get comments, experiences and recommendations of the representatives of the other countries.

Content

The main topics of the course are listed below:

- Introduction and overview of Upper Air Observing System
- The Parameters measured in Upper Air Observations
- Rawinsonde Calculations
- Rawinsonde Observations
- Quality Control of Rawinsonde Data
- Rawinsonde Reporting Codes
- General Information of Ozone
- Experiences of TSMS on Operations of Rawinsonde Observations

Course Format

The course will consist of theoretical and practical parts.

Internet Facilities

Internet will be available. The password will be provided to the participants during the training.

Working Languages of the Course

The Training Course will be conducted in English and all documentation will be in English. No translation/interpretation services will be provided.

Eligibility and Application

This training course is open to all participants from each country and aimed at the meteorological technicians, observers, and meteorologists who are involved in upper air observation, and have good level of English. The candidates will make an application via e-mail to the contact person.

Required Documents for Application

- 1- **Photocopy of passport:** to be submitted with the application form, if you possess your passport which you will carry when entering Turkey for this training. If not, you are requested to submit its photocopy as soon as you obtain it. *Passport photocopy should include the followings: Name, Date of Birth, Nationality, Sex, Passport number and Expire date.
- 2- **Nomination letter:** A letter signed by the Permanent Representative from your institution nominating you for the training course.

Training Course- Related Information

The course will be conducted at RTC Facility of TSMS in Istanbul between 15 and 20 October 2017. The participants will be informed about the address of the facility in due time. PCs would be available for the participants in the facility.

Travel Arrangements

As the host of the training, TSMS will arrange local transportation from the airport to the Facility and transportation for the excursion.

The international travel expenses between Turkey and the home town of the participants will have to be borne by the recipient members or by other means. Please note that there will be no international travel support by TSMS. The nearest international airport to Istanbul RTC Facility is Sabiha Gökçen International Airport. The alternative international airport is Atatürk International Airport.

Please be informed that **no per diem** and **travel costs** will be paid. It is expected from participants to cover all of their domestic expenses in their own country (including their domestic travel expenses in their own countries, visa fees, etc.).

Accommodation and Meal

TSMS will provide full board accommodation and meal including breakfast, lunch, dinner and coffee breaks for one participant from each country.

Insurance

Participants are fully responsible for any expenses in the event of death, illness or injury attributable to the attendance at course and for arranging such life, health and the other form of insurance as they consider appropriate. The participants are highly recommended to make a travel insurance which covers their travel and visit period. TSMS accepts no responsibility for compensation in such events.

Deadline for application:

Nomination forms should be sent to the course coordinator before **20 September 2017**.

Contact details of Course Coordinator

For any information regarding training and related issues, participants should contact with **Ms. Afife Hande Türkyılmaz** whose contact information is given below:

Ms. Afife Hande Türkyılmaz
