Subject: Report of the World Meteorological Organization (WMO) Second Quarter 2026 Financial Situation

Dear Sir/Madam,

The attached document, the Second Quarter 2026 Report on the Financial Situation of WMO, contains an analysis of the status of Members' contributions as at 30 June 2026, an analysis of the expenditures against the Regular Budget during 2026 and a discussion on the financial situation of WMO through the second quarter of 2026. The report also contains information regarding the receipt of voluntary contributions to date in 2026 and in comparison to prior years.

I welcome your comments on this report, and all questions can be directed to Mr Thomas Asare (tasare@wmo.int), the Assistant Secretary-General, with copy to Mr Brian Cover, (bcover@wmo.int), Controller.

Further reporting will continue to be done on a quarterly basis to update Members on the situation of WMO throughout the year.

Yours faithfully,

Prof. Celeste Saulo
Secretary-General

To: Permanent Representatives of Members with WMO

cc: Hydrological Advisers

SECOND QUARTER 2026
REPORT ON THE FINANCIAL SITUATION OF THE WORLD METEOROLOGICAL ORGANIZATION

This document presents updated information on the financial situation of the World Meteorological Organization (WMO) as of 30 June 2026, with particular emphasis on the status of contributions to the Regular Budget, the status of expenditures against the Regular Budget and the overall financial situation of WMO. Additional information is also provided regarding funds received under voluntary contributions through 30 June 2026.

B. Summary of the financial situation

The challenging financial environment in which international organizations, including WMO, operate—that began in 2025—continues through 2026. These challenges have manifested through the continued accrual of outstanding assessed contributions, as further described below, and have had a negative impact on financial liquidity, financial security and operations of WMO. Considering this financial context, the Secretary-General has undertaken a number of actions to safeguard liquidity since the beginning of 2025. These actions include the deferral of any reinvestment of financial savings resulting from the transformation of the WMO Secretariat and the implementation of significant cost containment measures. These cost containment measures have resulted in planned deferrals and delays in the recruitment of staff positions funded by the regular budget as well as reductions in expenditures associated with travel, consultants and some contractual expenditures. In addition to these measures, Switzerland, the host government of WMO, has forgiven the payment of the loan for the WMO Headquarters building for both 2025 and 2026, resulting in a savings of liquidity amounting to CHF 3.0 million (CHF 1.5 million annually).

In recognition that cost containment by the Secretariat would not be sufficient to address the projected shortfalls, the extraordinary session of the Executive Council (EC-Ext(2025)) created a Task Force on Recommended Modifications to the Strategic and Operating Plans for 2026–2027 (the "Task Force"). The Task Force was requested to:

(i) Develop financial scenarios reflecting possible evolutions of the Organization's financial situation;

(ii) Review the Strategic and Operating Plans for 2026–2027 to identify priorities among outputs and deliverables, elements that could be deferred to the next financial period, and the associated financial implications;

(iii) Submit its recommendations to the EC at its eightieth session, upon which it would complete its mandate unless otherwise decided by the EC.

The Task Force completed its work in April 2026 and the recommendations on prioritization were approved by Executive Council session in June 2026 (EC-80). The Secretary-General, in coordination with the Presidents of Technical Commissions, the Chair of the Research Board and the Presidents of Regional Associations is in the process of analysing the prioritized outputs to determine the actual level of savings that can be achieved through the prioritized results. Work on the analysis and initial implementation will continue into the third quarter of 2026 and a briefing to all Members will be organized when the process is complete.

Payments of assessed contributions through the second quarter of 2026, including the application of advance payments received in 2026, amounted to CHF 40.6 million, resulting in a total level of outstanding assessed contributions as of 30 June 2026 of CHF 73.2 million. The level of outstanding assessed contributions is higher, by CHF 24.1 million, as compared to 30 June 2025. The Secretariat continues to reach out to Members with significant levels of outstanding contributions to encourage payment of assessed contributions as soon as possible.

As a result of the reduction in assessed contribution payments, the financial stability and resilience of the General Fund has been severely compromised. As of 30 June 2026, the General Fund cash position, including the CHF 7.5 million balance of the Working Capital Fund, was CHF 18.8 million, approximately CHF 17.2 million lower than 30 June 2025. The cash position of the General Fund at the end of June 2026 was sufficient to meet the operational needs of WMO for approximately just over two months, with the Working Capital Fund available to support an additional one and a half months of Regular Budget requirements, should it be required.

During EC-80, a Member accounting for a significant share of the Organization's outstanding assessed contributions announced its intention to make a payment towards its arrears in the near future. The expected receipt of this amount will reduce, but not eliminate, the liquidity pressure on the General Fund. As such, the Secretary-General will continue to keep most cost containment and liquidity protection measures in place during 2026. Further, the Secretary-General will continue the analysis on identifying the actual cost reductions that can be identified following the work of the EC Task Force.

The level of actual expenditures, including obligations against the Regular Budget through the second quarter of 2026, represents 37.1% of the total 2026 approved budget. Staff costs, which represented a planned level of approximately 65% of the total 2026 Regular Budget, were consumed at 46.6% of the planned amount. Short-term staff cost and consultant costs were implemented at 7.7% of the planned amount representing minor temporary replacement costs for current vacant positions and a reduced level of consultancy services on a continued effort at cost containment and to reduce the overall consultant costs as described above.

The level of travel represents 21.4% of the planned budget, distributed between staff mission (46% of the total for this expense category) and participant/representative travel for WMO sponsored meetings (54% of the total for this expense category). The lower level of expenditure in this category as compared to the planned amount is due to overall efforts to contain travel costs and the limitations placed on activities requiring travel expenditures. The expenditure for the fellowship and training category represents 1% of the full year planned amount as result of the usual scholarship period where commitments for fellowships are made later in the year. The grants and financial contributions object of expenditure has been implemented at 17.4% of the approved budget. The level of expenditures for contractual and operating expenses during the second quarter of 2026 is 31% of the planned budget reflecting a combination of cost containment measures and the normal distribution of expenditure during the year.

C. General fund financial situation

Under Financial Regulation 8.4 (*Basic documents No. 1* (WMO-No. 15)), Members were obliged to pay 2026 assessed contributions to the Regular Budget and the advances to the Working Capital Fund on 1 January 2026. Members that have not done so are urged to ensure payment of their 2026 assessed contributions to the Regular Budget, as well as any assessed contributions in arrears and outstanding advances to the Working Capital Fund as soon as possible. The timely payment of assessed contributions is critical to the sound financial basis necessary for the optimum implementation of planned activities to deliver the approved Strategic Plan and the governance reform.

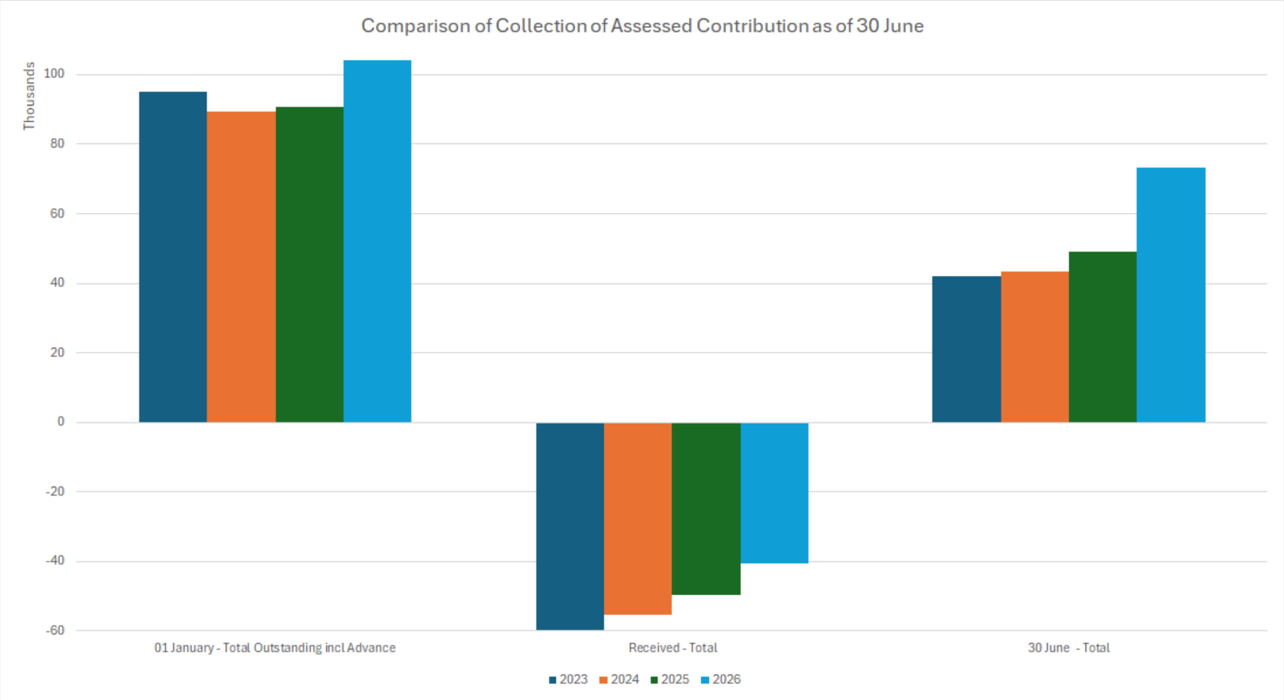
Status of Assessed Contributions

In accordance with Resolution 17 (EC-79) and Financial Regulation 8.2, the total assessed contributions for 2026 were equal to one half of the budget of CHF 138.7 million that was approved by the Executive Council (EC) for the 2026–2027 biennium. WMO Members were, therefore, assessed CHF 69.4 million in aggregate for 2026. As of 30 June 2026, WMO Members had made payments against the 2026 assessment totalling CHF 39.6 million, which represents a rate of collection for 2026 of 57%. The level of payments against the 2026 assessment was at a lower level through 30 June 2026 as compared to through 30 June 2025.

In addition to the 2026 assessed contribution, WMO began 2026 with outstanding assessed contributions from 2025 and prior years amounting to CHF 44.3 million, which was significantly higher than at the beginning of 2025 by CHF 15.2 million. Members made payments during 2026 against 2025 and prior year assessments of CHF 0.9 million, bringing the balance of arrears on 30 June 2026 to CHF 43.4 million, which was CHF 16.1 million higher than the outstanding arrears on 30 June 2025.

The total outstanding balance of assessed contributions as of 30 June 2026 was CHF 73.2 million, CHF 24.1 million higher than that of 30 June 2025. The total amount of outstanding assessed contributions on 30 June 2026 represents 105% of the total 2026 Regular Budget assessment. As further discussed in the section below on liquidity of the General Fund, the delays in the payment of assessed contributions by Members puts significant pressure on the General Fund cash resources to meet its financial obligations.

Table 1. Comparison of Collection of Assessed Contributions as of 30 June



(in thousands of Swiss francs)

	2026	%	2025	%	2024	%	2023	%

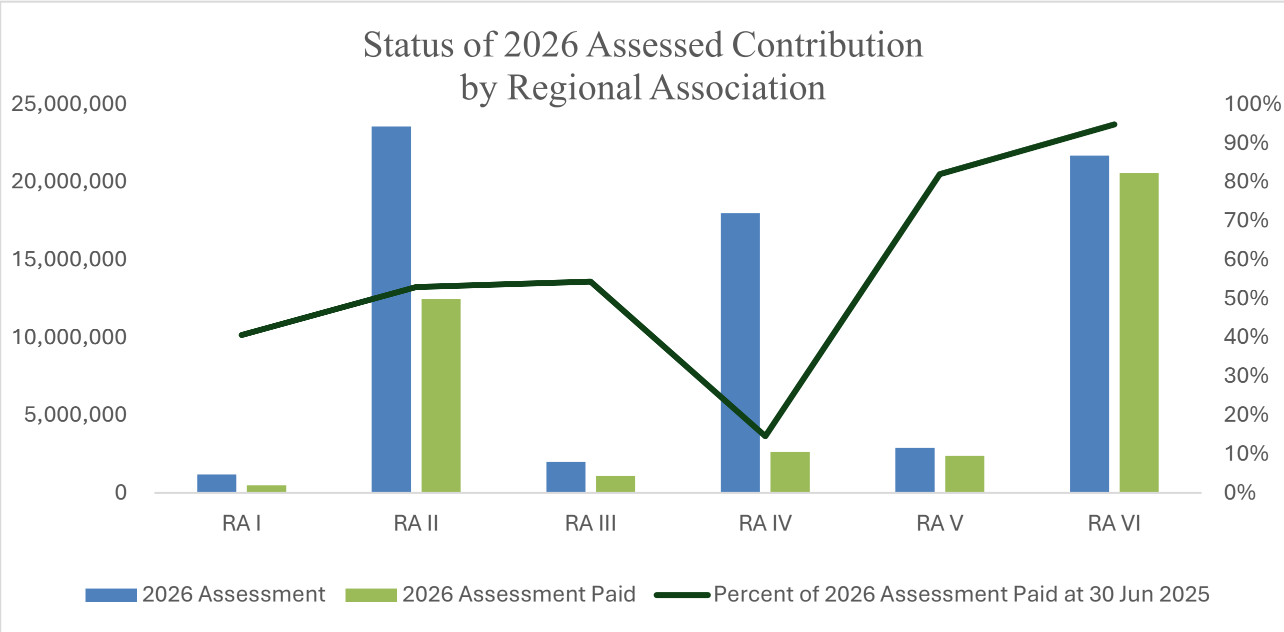
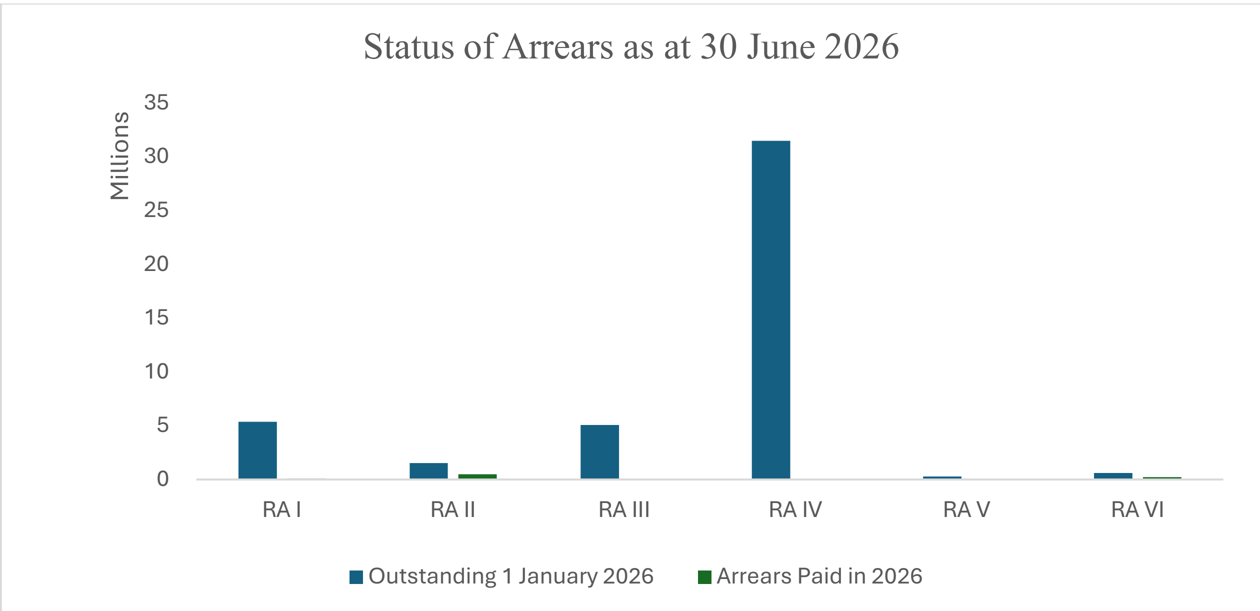
Members owing for current year only	38	42	44	47
Members owing for current and prior years	71	69	61	60

Regional analysis of outstanding assessments

The following graph shows the distribution of the 2026 assessment, the amounts of such assessment paid, and percentage of the total assessment paid by 30 June 2026 for each WMO Region.



The following graph shows the distribution of the amounts of arrears on 1 January 2026 and the amounts of payments against such arrears by 30 June 2026, based upon the grouping of WMO Members by region.



Status of voting rights

Any Member in arrears for more than two consecutive years is subject to the provisions of Resolution 37 (Cg-XI) – Suspension of Members for failure to meet financial obligations and is deprived of its voting and other rights. Therefore, any Member with unpaid contributions from 2023 became subject to the provisions of Resolution 37 (Cg-XI) as of 1 January 2026. Historically approximately 15% of WMO Members have voting rights suspended pursuant to this resolution. As of 30 June, the number of Members without voting rights at WMO was as follows:

Table 3. Members having lost voting rights as of 30 June

	2026	2025	2024	2023
Members having lost voting rights	37	33	36	28

In accordance with Financial Regulation 8.8, special arrangements as established by Congress concerning the repayment of long-outstanding contributions may be concluded with any Member in arrears for more than four years on the date of entry into force of such arrangements. Currently two Members have concluded and complied with such a repayment agreement permitting a waiver of Resolution 37 (Cg-XI) and permitting voting rights.

Detailed tables

The table "General Fund – Statement showing status of contributions as of 30 June 2026" provides details by Members regarding amounts due at the beginning of 2026, 2026 assessments, payments received during 2026, outstanding amounts for 2026 and prior years and outstanding advances to the Working Capital Fund.

Liquidity position of the General Fund

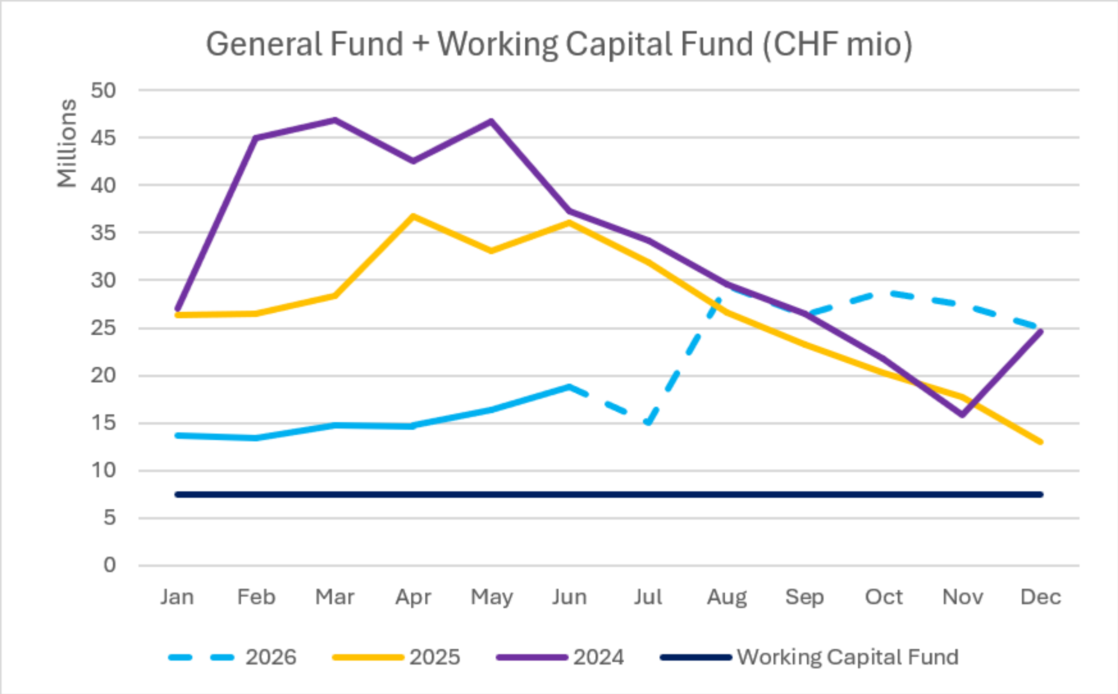
The table below shows the actual cash position for each month of 2024, 2025 and 2026 (to date) as well as the forecast for the remainder of 2026. As can be seen from the graph, the total cash balance of the General Fund plus the Working Capital Fund on 30 June 2026 was approximately CHF 18.8 million. This is comprised of CHF 11.3 million in the General Fund and CHF 7.5 million in the Working Capital Fund.

The cash balance of the General Fund on 30 June 2026 of CHF 11.3 million was lower than that as of 30 June 2025, by approximately CHF 17.9 million.

The CHF 11.3 million of General Fund cash on 30 June 2026 is sufficient to meet the operational needs of the General Fund for over two months while the CHF 7.5 million in the Working Capital Fund would, if necessary, be available to provide one and a half additional months of operational liquidity.

Considering uncertainties remaining regarding the timing and amount of payments of assessed contributions, the Secretary-General continues to undertake actions to address potential liquidity risks in 2026 and beyond. These actions include the implementation of significant cost containment measures during 2026 to address the short-term liquidity risks by the end of the year, including measures to defer recruitment to control staff cost expenditures and to reduce consultant, travel and other contractual expenditures. These mitigation measures will continue to have an impact on the delivery of the approved programme and planned activities for 2026 as resource constraints, delayed implementation timelines and some activities had to be deferred.

Although the Secretary-General now estimates sufficient liquidity of the General Fund and Working Capital Fund through 2026, the identified cost containment measures will need to remain in place until the financial uncertainty is resolved.



D. Regular budget expenditures up to and including 30 June 2026

Table 4 below shows the 2026 Regular Budget by object of expenditure and the percentage of the Regular Budget the expenditures represent. The expenditure amounts include both actual expenditures and obligated amounts recognized up to and including 30 June 2026 (in thousands of Swiss francs).

Table 4. Budget and Expenditure by Object of Expenditure on 30 June2026

Object of Expenditure	**2026 Budget**	**Expenditures through 30 June 2026**	**As a % of budget**
(a) Staff costs	45 682.5	21 267.0	46.6%
(b) Short-Term Staff and Consultants	3 816.3	295.4	7.7%
(c) Travel	5 821.9	1 245.9	21.4%
(d) Fellowships and Training	1 798.5	17.3	1.0%
(e) Grants and Financial Contributions	3 079.5	537.2	17.4%
(f) Contractual and Operating Expenses	8 285.0	2 565.6	31.0%
(g) HQ Building Loan Repayment	1 477.3	-	-
TOTAL	**69 961.0**	**25 928.5**	**37.1%**

Below is a summary analysis for each of the objects of expenditure:

Staff costs: Staff costs through June 2026 amounted to 46.6% of the approved budget. This is lower than the expected 50% due to the impact of the current vacancy level of unfilled identified positions in connection with overall cost containment measures with some off set from the residual cost of staff contracts on abolished positions that ended during the first quarter of 2026.

Short-term staff and consultants: The 7.7% rate of implementation at the end of the second quarter of 2026 primarily represents some minor actual costs of short-term staff to support current vacant staff positions while a small portion corresponds to consultant costs supporting the implementation of specific project-based deliverables during the second quarter. The amount is lower than the overall planned amount due to efforts to reduce the level of overall costs in these expenditure categories to maintain regular budget liquidity.

Travel: The level of implementation for travel expenditures for 2026 amounted to 21.4% of the approved budget. The lower level of expenditure in this category as compared to the planned amount is due to overall efforts to contain travel costs within the budget through reduced levels of meetings and several alternative meeting modalities, including the continued use of virtual or hybrid meetings, where appropriate. The level of staff travel was limited to 46% of the total, while 54% supported non-staff travel (participants and experts).

Fellowships and training: The budget level of the fellowship and training expenditure for 2026 amounted to 1% of the planned amount. The level close to zero is normal at this period of the year outside of the school calendars.

Grants and financial contributions: The level of expenditure in this area amounts to 17.4% which continues to be impacted by overall cost containment measures.

Contractual and operating expenses: Expenditures for contractual and operating expenditures amount to 31% of the 2026 annual budget for this category which is generally consistent with the planned amounts. The level of expenditures is lower as compared to the same quarter in prior years, reflecting a quarterly-based obligation approach to contain impact on resource availability.

HQ building loan repayment: In December 2025, the Swiss Government informed WMO that the 2025 and 2026 amounts due for the loan for the WMO Headquarters Building was to be forgiven. As a result, no payment of the building loan will be required in 2026. As such, no expenditure will be recognized in 2026.

Table 5 below shows the 2026 budget and expenditures through 30 June 2026 by long-term goal (LTG) and Budget Part (in thousands of Swiss francs).

Table 5. Budget and Expenditure by Budget Part on 30 June 2026

Appropriation parts	2026 Budget	Expenditures through 30 June 2026	As a % of budget
Part I. LTG 1. Better serve societal needs	14 848.1	4 365.1	29.4%
Part II. LTG 2. Enhance Earth system observations and predictions	14 009.3	5 253.9	37.5%
Part III. LTG 3. Advance targeted research	6 812.8	2 635.1	38.7%
Part IV. LTG 4. Close the capacity gap	15 892.9	5 901.0	37.1%
Part V. LTG 5. Strategic realignment of WMO structure and programmes	1 092.6	337.2	30.9%
Part VI. Policy-making Organs, Executive Management and Oversight	9 305.7	3 856.0	41.4%
Part VII. Language Services	7 999.6	3 580.2	44.8%
Total	**69 961.0**	**25 928.5**	**37.1%**

As can be seen from Table 5, the level of implementation across the appropriation parts is generally consistent and represents an overall 37.1% of the total budget—minor variations between inter-parts are mainly driven by the effect of expenditure-containment measures introduced in 2026 to mitigate risks associated with liquidity.

E. Receipt of voluntary contributions

The following chart includes a summary of the funds received under voluntary contributions for the period from 2022 through 2026. As can be seen from the chart, the funds received by WMO for voluntary contributions during the second quarter of 2026 were 51% more than the amount received in the second quarter of 2025, with CHF 13.2 million received during the second quarter of 2026. The pipeline of extrabudgetary contributions is very strong and a significant increase in the level of voluntary contributions received is expected during 2026. Additionally, the multi-year trend of cash contributions reflects the continued strong level of support by Members and other donors for WMO activities by providing additional funding to implement the Strategic and Operating Plan as well as for technical cooperation and capacity development.

During the second quarter of 2026, 50% of the contributions were received from bilateral donors, 34% from international organizations, 12% from Climate Funds and 4% other funding sources (Foundations and multilaterals). The level of contributions received from bilateral donors includes CHF 0.8 million (6% of total contributions received) to the WMO Commons (commons.wmo.int) By way of comparison, in 2025 total voluntary contributions were received as follows: 65% from bilateral donors, 4% from regional multilateral organizations, 28% from Climate Funds and the remaining 3% from all other funding sources (mainly international organizations or development banks).
