Subject: WMO Hydrology Survey, Hydrology Dashboard and upcoming Webinar

Dear Sir/Madam,

The World Meteorological Organization (WMO), in October 2019, invited hydrological advisers to participate in the WMO Hydrology Survey which is a part of the WMO Monitoring and Evaluation system. In 2020, 101 Members completed the WMO Hydrology Survey providing the information on governmental and non-governmental organizations that are responsible for operational hydrology within their country/territory, their capabilities, structure, hydrological networks, data-management and hydrological forecasting characteristics.

The preliminary results of the WMO Hydrology Survey were presented at the World Meteorological Congress at its extraordinary session in October 2021, where Members were informed about the development of a hydrology dashboard aiming at presenting and making available to the general public valuable information on operational hydrological services worldwide, collected through the WMO Hydrological Survey in 2020.

I am pleased to inform you that the Hydrology Dashboard has recently been finalized and is now accessible through the water page of the [WMO public website](#).

To demonstrate the Hydrology Dashboard, how it works, and how to interpret and use the available information, I would like to invite you to attend a hydrology dashboard webinar (only in English) which will be held twice, with the same content, to accommodate different time zones: on 22 April 2022 from 0700 to 0900 UTC and on 25 April 2022 from 1400 to 1600 UTC. The webinar flyer and agenda are attached to this letter.

Yours faithfully,

Dr Elena Manaenkova  
for the Secretary-General

To: Permanent Representatives of Members with WMO
