27 January 2023

Subject: State of the Climate 2022

Dear Sir/Madam,

Following the successful launch of the Provisional State of the Climate 2022 at COP27, I am pleased to announce the launch of the content preparation process of the final report, which will be published in March/April 2023.

The Secretariat has developed a dedicated online data collection platform for extreme and high impact events. The platform serves as a single entry-point for both Global and Regional State of the Climate in 2022. This will ease sharing information on high impact events, adequate geo-localization of the events, quality control and updates.

In this regard, I would appreciate if you could kindly report any extreme events experienced by your country in 2022 by using the survey in the following link: <https://arcg.is/10X1Ka0>. If you have already reported your preliminary events, we thank you for your input and request that you verify the information provided and add additional events that might have occurred in the latter half of the year.

Please submit or update your data **by 10 February 2023** at the latest. Any data received after the deadline cannot be guaranteed to be included in the report.

Should you require further details, please contact Mr Omar Baddour at obaddour@wmo.int and copy Ms Claire Ransom at cransom@wmo.int.

I would like to take this opportunity to thank you for your continued support to WMO activities.

Yours faithfully,

Dr Elena Manaenkova
for the Secretary-General
