Subject: Launch of the WMO e-library in a new format

Dear Sir/Madam,

I am very pleased to inform you that the [WMO e-Library](#) has been launched in a completely new format. It provides free access to a vast collection of publications on meteorology, climatology, hydrology and related areas. It contains publications produced by WMO, and those produced jointly with other agencies or sponsored/co-sponsored by WMO. Moreover, it also includes legacy publications of our predecessor, the International Meteorological Organization (IMO), whose 150th anniversary we are celebrating this year.

The WMO e-Library has many new features: the search engine has been optimized to search the full texts of publications; multiple filters and advanced search options make browsing and filtering a user-friendly experience; and, most importantly, the interface is now available in all six WMO official languages for the first time.

I hope that the new WMO e-Library will be very useful for your Service. I encourage you to promote its use among interested and relevant staff and the expert community. I invite you to send us any feedback for further improvements.

Yours faithfully,

Prof. Petteri Taalas
Secretary-General

To: Permanent Representatives of Members with WMO
