Subject: The French and Spanish versions of the online self-directed course, *Public-Private Engagement (PPE) in Weather, Climate and Water Services*, is now available on WMO Moodle

Dear Sir/Madam,

As you know, an online self-directed course, *Public-Private Engagement (PPE) in Weather, Climate and Water Services*, was formally launched by WMO in English in February 2023. Now, I wish to draw your attention to the French and Spanish versions of the same course, which are available on the WMO Education and Training Programme (WMO ETRP) learning platform ([English](#), [French](#) and [Spanish](#)).

As part of WMO's initiative to enhance multi-stakeholder collaboration, this course aims at developing knowledge, insight and skills in building effective communication and cooperation among the public, private and academic sectors as well as civil society.

I expect that by providing more language versions of the course, more Members will make the best use of the resources contained in the course to help the National Meteorological and Hydrological Services (NMHSs) and stakeholders in all sectors of the meteorological community understand the PPE-related principles and guidelines promoted by WMO, recognize the interdependent challenges and opportunities within, and unlock their potential to develop effective and reciprocal multi-stakeholder partnerships.

I take this opportunity to assure you that WMO will continue to strengthen the efforts to promote mutually beneficial engagement among public, private and academic sectors at the global and national levels and to support the development of Members' capacity for better weather, climate and water services.

Yours faithfully,

Prof. Celeste Saulo  
Secretary-General
