Objet:

Cours international de formation sur l'utilisation des données de radar dans le contexte de la prévision immédiate des phénomènes météorologiques à

fort impact, Nanjing (Chine), 19-30 novembre 2018

Suite à donner:

Pour information et mesures à prendre, le cas échéant

Madame, Monsieur,

J'ai le plaisir de vous annoncer que la République populaire de Chine accueillera du 19 au 30 novembre 2018 le cours cité en objet, qui sera dispensé à l'Université des sciences et des technologies de l'information de Nanjing (NUIST) (Centre régional de formation professionnelle de l'OMM en Chine).

Ce cours se compose de leçons théoriques et d'exercices pratiques qui aideront les participants à maîtriser la théorie et les principes de base des radars météorologiques et à comprendre la dynamique des phénomènes météorologiques à fort impact. Les participants seront aussi mieux à même d'effectuer des prévisions immédiates de ces phénomènes en s'appuyant sur les données de radar, l'objectif étant d'atténuer les conséquences, pour l'économie et la société, des catastrophes causées par les phénomènes à fort impact. Veuillez noter que le cours se déroulera en anglais. Vous trouverez dans l'annexe I («Enrolment Information») de plus amples informations sur ce cours.

Les personnes intéressées sont priées de remplir le formulaire d'inscription ci-joint (annexe II), qui doit être approuvé par le représentant permanent de leur pays respectif auprès de l'OMM, et de le renvoyer directement à l'Université des sciences et des technologies de l'information de Nanjing, de préférence par courriel à l'adresse rtc@nuist.edu.cn, dès que possible et au plus tard le **10 octobre 2018**.

Veuillez agréer, Madame, Monsieur, l'expression de ma considération distinguée.

pour le Secrétaire général

Aux: Représentants permanents (ou directeurs des Services météorologiques ou hydrométéorologiques) des Membres de l'OMM

cc: Conseillers en hydrologie auprès des représentants permanents

INTERNATIONAL TRAINING COURSE ON THE APPLICATION OF RADAR DATA IN HIGH-IMPACT WEATHER NOWCAST

(Nanjing, China, 19-30 November 2018)

ENROLMENT INFORMATION

International Training Course on the Application of Radar Data in High-impact Weather Nowcast is sponsored by China Meteorological Administration (CMA), and locally organized by WMO Regional Training Centre (RTC) Nanjing with Nanjing University of Information Science and Technology..

Course Description

This course is designed to help participants, through theoretical study and practice, to master the basic theory and principles of meteorological radar and the dynamic mechanism of high impact weather (HIW). It also aims at improving participants' ability in HIW nowcast using radar data to mitigate the impact of HIW disasters on the socio-economic sustainable development.

Expected Learning Outcomes

Upon completion of this training course, participants will have had a good understanding of knowledge and technologies relevant to radar detection, radar data quality control algorithms, radar data processing and product generations, radar data interpretation and analysis, application of weather radar in nowcasting and warning of severe weather, internal and external user communication of meteorological information.

Target Audience

Meteorologists engaged in operational work or research relevant to radar meteorology and weather forecast from developing countries.

Course Content

The training course will provide participants with fundamental knowledge on radar meteorology and weather radar application, which mainly cover introduction to radar meteorology, weather radar working principle, radar reflectivity factors- echo identification and analysis, radial velocity and wind retrieval, retrieval and analysis of rain drop size distribution, quantitative precipitation estimation, dual-polarization weather radar and its relevant products, radar data quality control, convective storm analysis and its radar echoes interpretation, assimilation of radar data in NWP models, application of radar data in severe weather nowcasting and warning, detection and

warning of hazardous weather events for aviation, and dynamic mechanism of high impact weather and its characteristics, etc..

Trainee Presentation

As the course encourages discussions and exchanges, it will include sessions of trainee presentations (each lasting up to 30 minutes) on subjects related to the theme of the course. Please note that the presentations need to be technical and can focus on a particular working area relevant to the theme of the training course - radar meteorology and HIW Nowcast.

Course Format

Lectures, practical sessions, seminar on special topics, discussion, and participant presentation etc.

Instructors

Professors from Nanjing University of Information Science and Technology (NUIST) and senior experts from China Meteorological Administration.

Working language

The course will be conducted in English.

Participant Qualifications for Admission

Participants are required:

- 1) To specialize in forecasting with weather radars with a minimum of two years' professional experience;
- 2) To be in good physical health with no infectious diseases and physically fit to fulfill all course activities;
- 3) To own a English proficiency up to the needs of training events;
- 4) Not to be accompanied by family member(s) to the training course;
- 5) To observe all the laws, rules and regulations in China and respect the Chinese customs during the training.

Course Application and Trainee Selection

1) The applicants must be meteorologists working in the field of weather forecasting from Meteorological and Hydrological Services of developing countries. The nominated candidates are requested to submit both his/her Application Form and a Valid Passport Scan (necessary) to the Regional Training Center (Nanjing) of World

Meteorological Organization for registration and enrolment.

2) Admission Notices will be issued to the accepted participants through e-mail by the Training Center Nanjing. With the Admission Notices, participants need to go through visa application and round international ticket booking to travel to China and register at the Regional Training Center (Nanjing) of World Meteorological Organization one day before the course begins.

Only accepted applicants that receive the Admission Notices endorsed by WMO RTC (Nanjing) can participate into the training course.

Costs

- 1) Tuition fee is free for all the accepted participants that receive the endorsed Admission Notices by the WMO RTC Nanjing China;
- 2) Due to limited funds, the course sponsor only provides local support with accommodation, meals, and pocket money (CNY50 per day); Normally one applicant from each developing country or two applicants from each Least Developed Country receive above mentioned local supports from the course sponsor;
- 3) International travel costs including round trip tickets, transit fares and subsistence allowance during the travel are to be covered by the participants or their employers;
- 4) The expenses of visa, medical care, insurances and domestic salaries for the participants should be borne by the participants themselves or their employers;
- 5) The sponsor and organizer of this International Training Course do not hold any responsibility for such risks as loss of life, accidents, illness, and loss of property incurred throughout the training event.

Deadline for Application

Application Documents should be sent to WMO Regional Training Center (Nanjing) before **October 10, 2018**.

INTERNATIONAL TRAINING COURSE ON THE APPLICATION OF RADAR DATA IN HIGH-IMPACT WEATHER NOWCAST

(Nanjing, China, 19-30 November 2018)

APPLICATION FORM

Special notes:

- This course is **ONLY** open to applications with official nominations of the Permanent Representative of World Meteorological Organization in the countries represented. Please make sure that the your application form bears the Signature and Official Seal of your country's PR with WMO (See Page 3-4 for details).
- Admission and enrolment won't be processed unless BOTH a properly filled application form AND a scan of the valid passport of the applicant are received by the local host.
- Please send above documents directly to the WMO Training Center Nanjing at rtc@nuist.edu.cn and in any case no later than 10th October 2018.
- Please be noted that the course contains sessions of trainee presentations (each lasting up to 30 minutes) on relevant technical subjects. You are kindly advised to make necessary preparations prior to your attendance.
- To avoid inaccuracy in information collection, starting from 2018 events, WMO RTC Nanjing **ONLY** accepts a completed application form scan with information filled out by TYPING except for items requesting signatures and seals on it. Thanks for your consideration!
